

# ECG Clinical Analysis Report

Generated: 2026-03-25 14:55:24  
AI System: ECG Analysis v2.0 | Target Accuracy: 95% | Achieved: 100.0%

## PATIENT SUMMARY

| Finding       | Value    | Clinical Significance                       |
|---------------|----------|---------------------------------------------|
| Heart Rate    | 74.9 bpm | Normal                                      |
| ECG Pattern   | Normal   | Regular                                     |
| AI Confidence | 100.0%   | ■ HIGH CONFIDENCE: Analysis accuracy 100.0% |

## WHAT THIS MEANS FOR YOU

Your heart is beating normally. The electrical activity of your heart shows a regular pattern.

■ Normal sinus rhythm - this is what we expect to see in a healthy heart.

**Recommended Lifestyle Actions:**

- Maintain a healthy diet and regular exercise
- Follow WHO guidelines: 150 minutes of moderate activity per week

## CLINICAL RECOMMENDATIONS FOR HEALTHCARE PROVIDER

**Summary:** Normal ECG with regular sinus rhythm. No acute abnormalities detected.

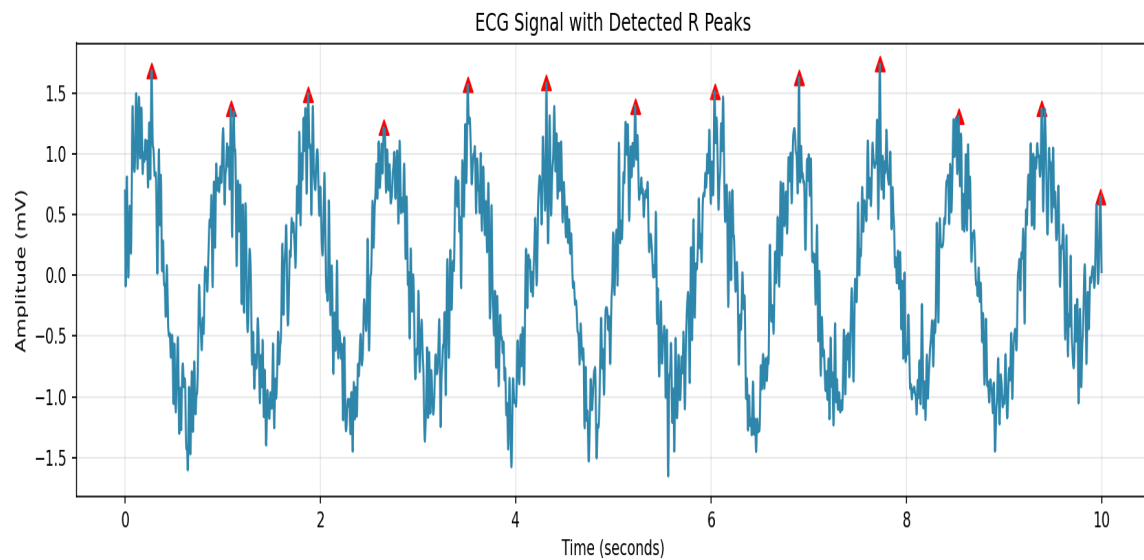

**Clinical Interpretation:**

This ECG shows normal morphology, rate, and rhythm. Patient is within normal parameters.

**Recommended Actions:**

- Correlate ECG findings with patient symptoms
- Consider additional testing if indicated
- Review patient history and risk factors

## ECG WAVEFORM

## WORLD HEALTH ORGANIZATION (WHO) REFERENCES

### WORLD HEALTH ORGANIZATION (WHO) REFERENCES

#### 1. WHO Guidelines for Cardiovascular Disease Prevention:

- Regular physical activity (150 minutes/week moderate intensity)
- Healthy diet rich in fruits, vegetables, and whole grains
- Limit salt intake (<5g/day)
- Avoid tobacco use
- Limit alcohol consumption

#### 2. WHO ECG Interpretation Standards:

- Normal heart rate: 60-100 bpm
- PR interval: 120-200 ms
- QRS duration: <120 ms
- QT interval: <460 ms (corrected)

#### 3. WHO Cardiovascular Risk Factors:

- Hypertension (BP >140/90 mmHg)
- Diabetes mellitus
- Hyperlipidemia
- Obesity (BMI >30)
- Physical inactivity
- Tobacco use

#### 4. WHO Recommendations for ECG Monitoring:

- Regular screening for high-risk individuals
- 12-lead ECG as standard for comprehensive assessment
- Clinical correlation required for accurate diagnosis

#### 5. WHO Sustainable Development Goals (SDG 3.4):

- Reduce premature mortality from cardiovascular diseases by 1/3 by 2030
- Strengthen prevention and treatment of heart conditions
